## The SYM ADX range

### **SYM Formed the Adventure Scooter Lineup**

SYM is showcasing the adventure scooter lineup at EICMA 2024 in its 70<sup>th</sup> anniversary. The A2 license compatible ADX 125 inherits the sports-tuned frame, mono shock rear suspension and \*Z.R.S.G. technology from the DRGBT. The ADX 125 is fuel economy and suitable for beginners and commuters. Its spectacular characteristics are great for daily commute and suburban light off-road experience. The ADX 300 shares the same crossover DNA with the 125 sibling; muscular body design, long range fuel tank and economy fuel consumption. The ADX 300 is powered by the reliable SYM 278 c.c. engine, in collaboration with the improved frame and suspension system based on the JOYRIDE 300, this adventurized urban maxi scooter offers intermediate paved and unpaved performance. The bionic ADXTG is top-notch in comfort and overall handling.

\*\*Hyper-VVS technology, all new motorcycle type frame, multilink suspension and adventure riding geometry, the TG is able to carry the explorer to expand new horizons.

\*Z.R.S.G.: SYM patented zero resistance starter & generator idling stop technology.

\*\*Hyper-VVS: SYM patented variable inlet valve system.
